

“Hey, Computer Mann!” Monthly Newsletter

Christmas 2017 Edition

Featuring our Company News, Tech Hints, Service Spotlight, and More.

by **Joel Mann** December 2017

This year flew by so fast! I can't believe that we are less than a month away from 2018. Even though 2017 seemed to go by at warp speed, we have accomplished so many things at Mann Tech I am quite proud of.

First, we brought back this newsletter to keep in touch with our customers and hopefully make some new ones. For those who do not know, we have a printed version of this newsletter available at our store. Also, some of our customers have given us the opportunity to place some copies in their establishment as well. I would like to take the time in thanking them now: Dan R's Automotive, Wittkamp Insurance, Dr. Glen Davis, DDS,

Portage Valley Hearing, East Toledo Family Center, Cedar Creek Family Dental and Northwood Door. Thank you so much! If you are interested in hosting printed copies of our newsletter in your place of business, please contact Mike Mann at mike@manntechnologies.com.

Next we have improved our computer diagnostics by updating our technician tools. This has made our diagnostics process more efficient and thorough.

We have also completed much needed remodeling to our headquarters. We have replaced windows, the main entrance door, updated our restrooms, remodeled our back offices, and made energy efficiency updates.

Finally, we have increased our showroom inventory of computer parts and cables.

We have many more improvements in the works for 2018 and we hope you will stop by and give us a visit. Have a Merry Christmas and a Happy New Year!

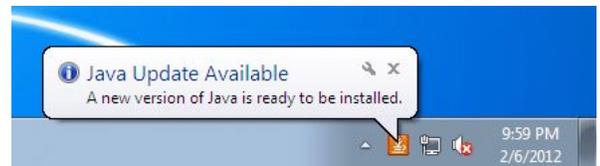

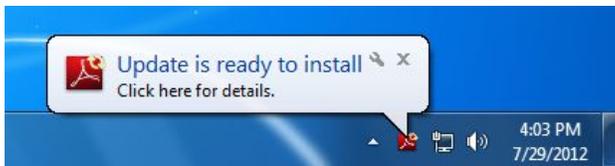

Manny's Helpful Hints

How do I keep my computer running like new?

1. Be sure to keep your antivirus software updated and subscription active. Most antivirus programs will update themselves and run scans automatically. If you are unsure about your antivirus software or would like more information, please contact us right away.
2. Always update Java, Adobe Reader, and Adobe Flash when asked.

3. Keep your Windows or Apple OS always updated to the latest release.
4. Invest in CCleaner Cloud. This app will keep your computer clean from junk files and also monitor your computer for problems. Please contact us for more information.
5. Have your computer regularly serviced by a reputable computer company. Manny of course recommends Mann Technologies! For home users, usually once a year is typical. Business computers may require quarterly or even monthly service. Please contact us for more information.
6. Always have a backup! Disasters happen and it is always recommended to have a backup of all your data. We can help you with this as well.

Do you have a question that you would like Manny to answer in our next issue? Send your question to marketing@manntechnologies.com.

**Need old VHS tapes
converted to DVD?**

Media Services

by [Mike Mann](#) December 2017

Sometimes it might be nice to travel back in time. Think of all those you might want to see or say something to. Too bad time travel is the stuff of science fiction and t.v. shows.

However, the next best thing is to go back and watch old video tapes. Back in the 80's and 90's video taping was all the rage and everything from birthdays to graduations were being recorded. Then seemingly overnight the technology changed and all those tapes got stacked up in the closet or some other safe place, and stayed there ever since.

Now we have the technology to **transfer those favorite memories to DVD**. You can watch them again and see how the youngsters have grown up, or even some friends or family that are now gone. Bring your video tapes to Mann Technologies and we can save those memories to view whenever you like.

Pricing starting at \$19.95 per tape. Additional copies may also be purchased, see us at the store for details.

From all of us here at Mann Technologies, Have a safe and Merry Christmas!
